+1 (669) 241-0869 ngzhian@gmail.com @ngzhian

Java, Python, JavaScript, HTML, CSS, SQL, C, Unix, Vim, Compiler, VM, PL, Devtools

Professional Experience

Google, Software Engineer, Mountain View, Jul 2017 - Present

- Work with Partner Engineering team and Partners to write, maintain, and fix automated test suites for device compatibility certification
- Triage and proactively fix user-reported bugs in various applications during device testing phase
- Investigate and benchmark changing OS file system to save storage on device

Uber, Software Engineering Intern, San Francisco, May 2016 – Aug 2016

- Run A/B test to improve web sign-up conversion rate
- Extract portion of legacy Python code base into a separate service (Tornado, Thrift)

Stripe, Software Engineering Intern, San Francisco, February 2016 – May 2016

- Prototype Scalding data pipeline to calculate connect fee for thousands of managed accounts
- Extend EmberJS web app to simplify and streamline identity verification process for managed accounts

Google, Software Engineering Intern, New York, October 2015 – January 2016

- Extend legacy internal tool (Java Reflection, ProtoBufs, WSDL, SOAP) powering AdWords and DoubleClick
- Add features to an internal issue management bot written in Python, used by hundreds of teams in Google, eliminating tedious work done by the team every quarter to get status updates on bugs
- Speed up DoubleClick for Publishers Developers Site generation by 5x

EquityZen, Product Engineering Intern, New York, August 2014 – July 2015

- Build web application on Python/Django stack backed by Celery, RabbitMQ, PostgreSQL
- Increase test coverage of code over 5x, using unittest, nosetests, coverage.py, and Selenium
- Optimize web page delivery speed, >20% speed increase, using cache and compression
- Implement third party integrations with HelloSign, MailChimp, CrunchBase

Ganglia, Google Summer of Code (GSOC) Student Participant, Singapore, May 2013 – Aug 2013

- Improve existing code base of JMXetric by adding unit tests and refactoring
- Create a configuration discovery tool to easily generate XML configuration files

Centre for Strategic Infocomm Technologies (CSIT), Intern, Singapore, Feb 2012 – Jul 2012

- Perform preliminary studies on Hadoop, HBase, Cassandra to help with Big Data problems
- Develop an API on top of Hadoop and HBase for clients to communicate with database easily

Projects

Open-source projects and contributions

- Creator of [ChromeLens](#), [QuickView for YouTube](#), [pycrunchbase](#), [colordiffs](#), [multi-step-modal](#), [ocs](#), [where is it?](#)
- Contributor to [NUSMods](#), [MkDocs](#), [PyBambooHR](#), [Django](#), [gmetric](#), [jmxetric](#), [CodeMirror](#)

Leadership Experience
